### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claimed closed circuit drying method including the feature of continuously recovering fluid and water vapor from an object, introducing a non-condensable gas to a chamber to return the chamber to atmospheric pressure, and separating drying fluid from recovered water vapor and retaining drying solvent for use in drying subsequent objects chamber while continuously introducing additional fluid to the chamber is not found in the prior art either singly or in combination. This feature is considered to patentably distinguish the invention from the prior art particularly Bergaman (US 6,745,494) in view of either Chang (US 6,289,605) or Raajmakers (US 6,263,587) cited in this action, which is considered to be the closest prior art with respect to the claimed invention. Reference N or reference O, also cited in this action is considered to be the most relevant foreign prior art with respect to the claimed invention. The patentably distinguishable feature is found in the sole independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
